

# Healthy Child Care Ohio

## Child Care Health Consultants (CCHC)

Child Care Health Consultants (registered nurses) are available in every county across the state to assist child care providers with general health and safety issues. CCHC's can provide information to providers from diabetes and asthma to consultation on children's immunization records and licensing compliance reports. The nurses will not provide recommendations or specific care plans for children with special health care plans. They can provide information on how a family can obtain health insurance, if applicable, and how to locate pediatric services. Child Care Nutrition Consultants are available in select areas of the state.
